Acknowledgments

The Defense Manpower Data Center (DMDC) is indebted to various people for their assistance in the development of this tabulation volume. We thank Timothy Elig and Richard Riemer (both of DMDC) for contributing their expertise. We also wish to thank Lt Col Sheila Tronsdal for her guidance while in the Office of Enlisted and Personnel Management. Our thanks also go to Sally Mohamed (American University, Consortium Research Fellows Program) for her assistance in ensuring data quality control.

Data collection and dataset preparation for the *2000 Military Exit Survey* were performed by Data Recognition Corporation (DRC) under contract M67004-99-D-0001/0009. Contributing staff at DRC in the Survey Division include the Federal Government Team (Mary Latta, Mary Ellen Hartmann, Heidi Koelker, Dawn Nelson, and Michelle Tostenson). They were supported at DRC by the staffs of Comment Processing, the Call Center, Survey Operations, Clerical Operations, Print Services, Inserting, and Warehousing.

Data processing and production of this tabulation volume were performed by Westat under contract M67004-98-D-0002/0021. Contributing staff at Westat include Mary Ann Deak, Cynthia Helba, and David Rockwell. They were supported at Westat by Jennifer Kawata, Dawn Williams, Adefisayo Adebayo, and Rose Windle.

2000 MILITARY EXIT SURVEY: TABULATIONS OF RESPONSES

Preface

The *2000 Military Exit Survey (MES)* is a comprehensive exit survey of service members leaving active duty with honorable discharges between April and September 2000. The first joint-service exit survey, the *MES* was developed in accordance with Congressional legislation requiring that every member separating from active duty during a six-month period be surveyed about his/her reasons for leaving. This requirement for a one-time survey was included in the National Defense Authorization Act for Fiscal Year 2000 (Public Law No. 106-65). The *MES* is sponsored by the Officer and Enlisted Personnel Management Directorate, under the auspices of the Office of the Deputy Assistant Secretary of Defense for Military Personnel Policy.

Survey Methodology

Survey Design

The *MES* was designed to meet the need for timely information on departing active-duty service members during a period of heightened concern about the retention of quality military personnel. The *MES* provides information on separatees' backgrounds, reasons for leaving, plans after separation, plans for affiliation with a Reserve component, perceptions of civilian opportunities, and their attitudes towards command climate, leadership, pay and benefits, job satisfaction, and other aspects of their military experiences. Many of the survey questions were derived from the *1999 Survey of Active Duty Personnel*, which asks about the experiences, attitudes, and demographics of active-duty personnel (Wright, Williams, and Willis, 2000).

A copy of the 16-page questionnaire is provided in the Appendix. The survey instrument is grouped into six sections:

- *Background* – includes questions on Service, paygrade, source of commission, duty status, aspects of the separation situation, gender, race/ethnicity, education, type of housing, marital status, sources of income, financial condition, and discussions with children aged 10 or older about post-high school options.

- *Assignment Information* – includes questions on total years of active-duty service, hours worked, extra duties, numbers of permanent changes of station, location of permanent duty station, and amount of time and nature of duties away from the permanent duty station.
- *Career Information* – includes questions on reasons for joining and career intentions when first entering active duty, current term of service, likelihood of being allowed to stay on active duty at the end of the current term, promotion opportunities, plans and reasons to join/not join the National Guard or Reserve, satisfaction with 39 diverse aspects of active-duty life and identification of those aspects which, if improved, would influence the member to stay.
- *Leadership/Command Climate* – includes questions bearing on climate and communication at different levels of leadership, the paygrade of the immediate supervisor, and how well the immediate supervisor performs on twelve dimensions of leadership.
- *Military Life* – includes questions on how military life and work each compared to initial expectations, advice the separatee would give about joining the military, general satisfaction with the military way of life, whether the separatee would again choose to stay beyond first enlistment or initial obligation, how specific opportunities within the military compare to the same opportunities in the civilian world, importance of military activities, military standard of living, preparedness and opportunities for civilian jobs, military community support and friendships, supportive and respectful unit interactions, fair Service promotions and Service pride and sense of identification.
- *Separation/Retirement Information* – includes questions on preparations for leaving, timing of decision to leave, primary activities after leaving, use of Montgomery GI Bill educational benefits, whether civilian work for pay is planned and time spent in job search, civilian employment status, effect of military experiences upon civilian employability, the similarity of military

occupational specialty to the expected civilian job, whether a reenlistment/retention bonus would influence staying, the influence of key others upon the decision to leave, the extent to which each of 31 reasons for leaving was important, and the five most important reasons for leaving.

Survey Population

The population of interest consisted of all active-duty Army, Navy, Marine Corps, Air Force, and Coast Guard personnel voluntarily separating or retiring with honorable discharges, including members transferring from a regular component to a reserve component. The survey was distributed to DoD Service separatees between April 1 and September 30, 2000, and to Coast Guard separatees between early July and September 30, 2000. Complete details of the survey development, administration, and dataset creation are reported by Hoover, Randolph, Riemer, and Mohamed (2002).

A total of 16,033 eligible separatees returned usable surveys. Eligibility was determined by self-report and/or administrative record data when available. Separatees were classified as ineligible if they reported that their separation was involuntary or other than a voluntary separation or retirement (Q5= 6 or 7), or that they were not eligible for reenlistment (Q6= 1), or that their separation from active duty was not honorable (Q7= 2), or if data on eligibility were missing. The data were weighted to represent the DoD and Coast Guard personnel who voluntarily left active duty with honorable discharges during the fielding period of the survey. The 16,033 eligible returned surveys represent a response rate of 20%. Complete details of response rates and weighting are reported in Reimer, Hoover, Randolph, and Elig (2001) and Hoover, Randolph, Riemer, and Mohamed (2002).

Survey Administration

The survey was administered at Department of Defense and Department of Transportation separation/transition points as part of out-processing procedures. Transition center administrators distributed the survey to all members leaving voluntarily with honorable discharges. Separatees were also provided with business reply envelopes to return the completed survey to the Defense Manpower Data Center survey processing center.

In March 2000, letters were sent notifying the separation/transition points of the four DoD Services of the survey. Surveys and business reply envelopes were then shipped in bulk to each site. The Coast Guard received an initial shipment in June for its survey distribution which began in early July. On

June 30, a letter was sent reminding DoD administrators that they were to continue distributing surveys through September 30. The letter included a list of FAQs (frequently asked questions), addressing potential concerns respondents might have about the survey itself and use of the data. By the end of the fielding period, 113,403 questionnaires had been mailed to survey distribution sites.

Analytic Procedures

Estimation Procedures

Surveys were returned by 20% of the total eligible population of separatees and thus the data required weighting to produce population estimates. This weighting means that standard statistical software packages may be inappropriate for computing standard errors, variances, or tests of statistical significance. For this report, variance estimates were calculated using WesVar¹, a software application specifically designed to provide valid statistical estimates for complex surveys. WesVar uses replication methods for variance estimation.²

The survey data most likely contain error similar to the sampling error occurring in sample surveys when data are obtained from only a fraction of the population. Standard errors are estimates of the random variation around population parameters such as a percentage or mean. Estimates in these tabulations are percentages and are reported with 95% confidence intervals.

Percentages in these tabulations have Wilson upper/lower limit confidence intervals, which are asymmetric (Wilson, 1927; Newcombe, 1988). The Wilson confidence interval sets a lower bound of 0% and an upper bound of 100%. This means that, if the lower symmetric confidence interval for a small percentage would normally include a negative number, the lower Wilson confidence interval cannot go below 0. Likewise, if the upper symmetric confidence interval for a large percentage would exceed 100% using the standard approach, the Wilson method limits the upper interval to 100.

² Replication is an empirical method of establishing sample variation by drawing repeated subsamples from the obtained sample and comparing results to those obtained for the full sample. This empirical calculation of variance is in line with the theory of sample variation, which draws upon the concept of creating repeated samples to establish confidence intervals. Replication methodology produces variance estimates very close to those produced using Taylor series linearization methodology, the main alternate method of variance estimation.

Subgroups

The survey results are tabulated in these reports for Service members as a whole and for subgroups defined by Service, paygrade category, gender, and by a six-category career measure combining retirement/separation status (whether the Service member is retiring or separating before retirement) with military career intent at the time the member *first* joined the Service (intended to stay on active duty until eligible for retirement, intended to complete term/obligation and then leave active duty, not sure if would stay on active duty or leave after term/obligation). Analyses assigned respondents to categories within subgroups primarily through answers provided on the survey. In the case of missing data, category assignments for Service, paygrade category, and gender were completed using administrative records where possible.

Subgroups were constructed as follows:

- **Service** is defined by the response to Q1, "From which Service are you separating?" Based upon responses, members are assigned to one of five categories: Army, Navy, Marine Corps, Air Force, or Coast Guard.
- **Paygrade** is based on Q2, "What is your current paygrade?" The original 21 categories are collapsed to four for analyses: E1-E4; E5-E9; W1-W2 and O1-O3; W3-W5 and O4 and above.
- **Gender** is obtained from Q11, "Are you: (1) Male (2) Female," and is coded accordingly.
- **Retirement/Separation** is defined by responses to Q5, "What is your current separation situation?" and Q35 "What were your career intentions when you first entered active duty?" Retirement/separation has six categories:

- 1) intended to stay to retirement and did retire (Q35=1 and Q5=2)
- 2) intended to stay to retirement but left before retirement (Q35=1 and Q5=1,3,4, or 5)
- 3) intended to leave after term/obligation but retired (Q35=2 and Q5=2)
- 4) intended to leave after term/obligation and left before retirement (Q35=2 and Q5=1,3,4, or 5)
- 5) not sure about staying and retired (Q35=3 and Q5=2)
- 6) not sure about staying and left before retirement (Q35=3 and Q5=1,3,4, or 5)

Data Suppression

Unstable estimates in table cells were suppressed or annotated. Estimates may be unstable because of a small sample size for that cell or large variance in the data or weights. The following rules were used:

- A cell estimate was not published if the unweighted denominator size (i.e., column size) was less than 30. These cells are annotated "NR" (Not Reported).
- A cell estimate was published with an asterisk if the unweighted denominator size was 30 to 59.
- A cell estimate was published with an asterisk if the relative standard error for that estimate was 30% or greater.

When a cell estimate is reportable (i.e., unweighted denominator size greater than or equal to 30), a cell estimate greater than 0.0 and less than .05 is reported as 0.0.

Confidence intervals are reported as "NR" when the unweighted denominator size (i.e., column size) is less than 30. Confidence intervals are reported as "N/A" when the cell estimate is equal to 0% or 100%.

2000 Military Exit Survey

2000 Military Exit Survey

OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE
4000 DEFENSE PENTAGON
WASHINGTON, DC 20301-4000

FORCE MANAGEMENT
POLICY

3 March 2000

MEMORANDUM FOR ALL SERVICE PERSONNEL SEPARATING
BETWEEN 1 APRIL 00 AND 30 SEPTEMBER 00
SUBJECT: Exit Survey

The highest level of service a Nation may ask of any citizen is duty with its Armed Forces. The very nature of military service requires you place individual freedoms second, in order to support and defend your fellow citizens. There is no greater test of character or citizenship. At times this service may have seemed thankless, but rest assured a grateful nation recognizes your selfless contribution.

As you prepare to separate from active duty, we ask that you take the time to complete the attached survey. We are interested in your responses concerning your decision to leave active duty, your experiences while on active duty, and plans for civilian life. Your answers will enable the Department of Defense and Congress to better understand the factors that influenced your decision to leave and provide the background to initiate changes that would enhance job satisfaction and quality of life within the Armed Forces.

Please complete the survey and seal it in the envelope provided. Then return it as part of out-processing activities, or place it in any post office box. We would ask that you return the survey as soon as possible, but no later than 30 September 2000. If you have questions about the survey, please call 1-800-994-0040 or send e-mail to mes@datarecognitioncorp.com.

Your responses are important as we continually work to enhance the conditions of military service. Thank you for your participation. Best wishes as you depart the Armed Forces and join the alumni of military veterans whose patriotic service and sacrifices have shaped our Nation.

A handwritten signature in cursive script, reading "P. A. Tracey", is positioned above the typed name and title.

P. A. TRACEY
Vice Admiral, USN
Deputy Assistant Secretary
(Military Personnel Policy)

PRIVACY NOTICE

In accordance with the Privacy Act of 1974 (Public Law 93-579), this notice informs you of the purpose of the survey and how the findings will be used. Please read it carefully.

AUTHORITY: The "National Defense Authorization Act for Fiscal Year 2000" (Public Law 106-65, Section 581); Executive Order 9397; 10 USC 136 and 2358.

PRINCIPAL PURPOSE: The purpose of this survey is to provide timely information on the reasons military personnel leave active duty. The retention of qualified personnel is of concern to the U.S. Congress and the Departments of Defense and Transportation. The information collected will be analyzed to examine the effect of existing initiatives to increase service members' job satisfaction, quality of life, and retention in the Armed Forces, and suggest additional actions or policies intended to achieve these goals. This survey asks about your attitudes toward your military experience, possible reasons for leaving, and plans and expectations for civilian life.

ROUTINE USES: Reports will be provided to the Secretaries of Defense, Transportation, and each Military Service, and Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or professional journals, or reported in manuscripts presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individual(s).

DISCLOSURE: Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey instrument will be treated as confidential. Identifying information will be used only by persons engaged in, and for the purposes of, the survey. Only group statistics will be reported.

The figure illustrates a process of pattern formation or evolution over time. It is divided into three main stages, each represented by a grid of small squares. Stage (a) shows a random distribution of black and white squares. Stage (b) shows the emergence of some local order and small clusters. Stage (c) shows a more complex, well-defined pattern with distinct regions and boundaries. Arrows indicate the temporal progression from (a) to (b) and from (b) to (c).

14. ABSTRACT The 2000 Military Exit Survey gathered information on DoD Service and Coast Guard members voluntarily separating or retiring from active duty with honorable discharges between April and September 2000. Information includes personal and military background, reasons for leaving, plans after separation, plans for affiliation with a Reserve component, perceptions of civilian opportunities, and attitudes toward command climate, leadership, pay and benefits, job satisfaction, and other aspects of military experience. The information derived from the survey will be used to assess military personnel issues influencing separatees' decisions to leave active duty. This report presents tabulations for the separatees as a whole and for subgroups defined by Service, paygrade category, gender, and a composite measure combining military career intent when first joining the Service with actual separation status (retiring or separating before retirement).
